

Dynamic Forms
User Acceptance and Approval Form Instructions
Tuesday, October 3, 2023

The **User Acceptance Test Plan Form** is a critical part of the overall project to capture the overall testing objectives and how testing will be performed. This electronic form captures and describes the overall testing effort, objectives (*what the team is planning to verify/validate*), scope (*what will be tested based on requirements and/or change or will not be tested*), schedule (*how, who and when testing will start and end*) and resources required to complete the integration and production verification testing phase of the project.

Testing completed by the implementation team and the end-users is to ensure a quality product and successful movement into the production environment. **Medium** and **high priority** projects must have a separate test plan/case document with signatures. The test deliverables should include test cases, test results and testing timeline and resources.

The **initiator** (*Functional Lead*) should begin the process for the form and monitor throughout the final production verification phase. The sign off of the project team members agree that testing meets quality standards and ready to move into production environment.

The steps below are general instructions for using the electronic UAT form. These steps are to be performed after departmental testing is completed for all projects.

The Functional lead for the Project should go to Aggie Hub/Forms/Employee/ITS to find the link to the UAT Form

1. Click Link using single sign-on (SSO): <https://hub.ncat.edu/administration/its/forms/index.php>
2. The Form Instruction/Participants Page should appear.

The screenshot shows a web form titled "Form Participants". It contains three main sections, each with a dropdown menu and a "Please select" prompt. Below the second dropdown, there are three input fields labeled "First Name", "Last Name", and "Email". At the bottom of the form is a "Continue" button.

Form Participants

ITS Department Head
Please select
Contact information is in the format Description: Last Name, First Name

Project Manager
First Name Last Name Email

Technical Team Lead (ITS)
Please select
Contact information is in the format Description: Last Name, First Name

Continue

3. Enter requested data on the instruction page (**Note:** *Not all projects will not have a PM therefore the technical lead will fill the PM role*)
4. Select **Continue**
5. Form Page should appear

- Fill in all required information on the form for **PART I**. (**Note: A field marked by an asterisk (*) is required.**)

User Acceptance Test Plan & Approval Form

Direction: Submit a completed form after User Acceptance Testing is completed and sign-off is obtained by the Requested to the Project Manager and ITS.

Cherwell Ticket Number * 157306

Part I: Test Plan:

Project Name: * User Acceptance Test Plan & Approval Form -

Prepared By: First Name: [Savage] Last Name: [Fanning-Garner]

* Yes No Does this request require Functional Supervisor approval to move to Production? Please select Yes or No (This is required field)

Overview

Provide brief overview of the project including the test scope

- a. Testing will include the following items:
- b. The following items will not be tested:

Entire Form Design & Testing

Tester Name(s)	Role	Department(s)	Comments (if Required)
Sandra Fanning-Garner	Project Manager	ITS/EAS	
Jackson Leonard	Technical Lead	ITS/EAS Dynamic Forms	
George Hairston	Technical Lead	ITS/EAS Dynamic Forms	
Pilot Test Team	Different Areas	Banner Maintenance	

Test Approach/Strategy

Testers are required to test the following:
 Test work flows specific to each department as defined in the service catalog and document the testing performed.
 Functional testing – Testing completed by the implementation team and the end-users to ensure successful movement in to the production environment.
 Medium and high priority projects must have a separate test plan/case document with signatures.

Test Measurement

Pass/Fail Criteria
 Pass/Fail is based on each step of the test case completing as stated in the expected results. If it completes as stated, it passes. If it does not complete as stated, it fails.

Suspension Criteria and Resumption Requirements
 Suspension of the testing will occur if an overall system problem occurs that causes the testing to be invalid. Testing will resume after the system problem has been corrected.

TEST Deliverables:

Schedule: EAS Timeline between other projects If your schedule does not fit in the comment box, please attach it here.

Risks and Contingencies: low risk

- Continue to **Part II – FEATURES TO BE TESTED** of the form and complete filling in the information.
- Fill in and/or attach test results with the final testing information to include the plan, test results, etc. For cycle 1, **Integration Testing** appears on the form under **Integration Testing Phase (Pass or Fail)**.

PART II OF THE FORM

Part II. Features to Be Tested (Test Cases): (Can be recreated using an excel spreadsheet)

Please upload any test plans & results (Optional)

Test Case ID #	Test Item (TASKS):	Expected Results	Integration Testing (Pass or Fail)
01	Test all fields of the UAT For	All fields work and expect data	Passed
02	Routing Verified	route to all approvers	Passed
03	Approval	verify approved	Passed
04	Backend Development	Verified	Passed
05	Email instructions	Updated	Passed

DBA Needed?

Note: The DBA checkbox is only for use by the project Technical Lead (ITS).

Signature(s)

Tester(s)	Date of Testing	Area/Module Tested	Department
Sandra Garner	06/07/2023	Entire Form	ITS
George Hairston	06/07/2023	All Fields of the form	ITS
Jackson Leonard	06/07/2023	All Fields of the form	ITS

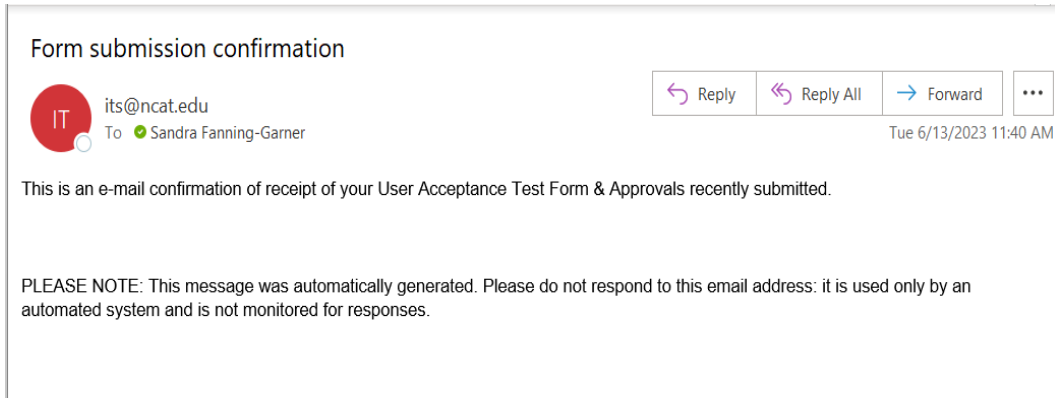

- Use the section: '**Comment required if testing failed**' for testcases that do not pass with justification or do not pass with acceptance of the risk of the failed testcase. This section should be used for **exceptions only**.

Part II. Features to Be Tested (Test Cases): (Can be recreated using an excel spreadsheet)

[BLOCK WAS MOVED] (Optional)

Test Case ID #	Test Item (TASKS):	Expected Results	Integration Testing (Pass or Fail)
01	Test all fields of the UAT Form	All fields work and expect data	Passed
02	Routing Verified	route to all approvers	Passed
03	Approval	verify approved	Failed
	Comment required if testing failed:		
	Option2: Failed but not required for Go Live.		
04	Backend Development	Moved to process and archive	Passed
	Verification portion	verification blocks appear	Passed

- After completion of PART II above – **Integration Testing (Cycle I)** can be signed.
- Hit submit form. The initiator will receive a confirmation email.

12. AFTER **PART II** is completed, the form is then routed to the following participants for approval. Each participant will receive an email with link to select:

Part III: Approvals

Type Name: Initiator/Functional Test Lead Signature: _____

Type Name: Functional Lead Supervisor's Signature: _____

Type Name: ITS Technical Team Lead Signature: _____

Type Name: ITS Department Head Signature: _____

Type Name: DBA Team Lead Signature: _____

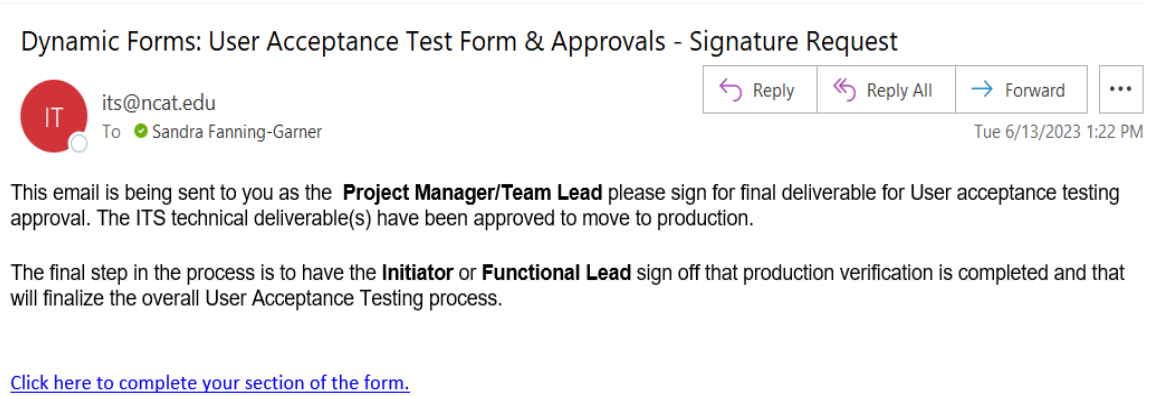

Type Name: Project Manager Signature: _____

Reason for the Return for Revision:

This completed User Acceptance Form is housed in sharepoint with project documentation.

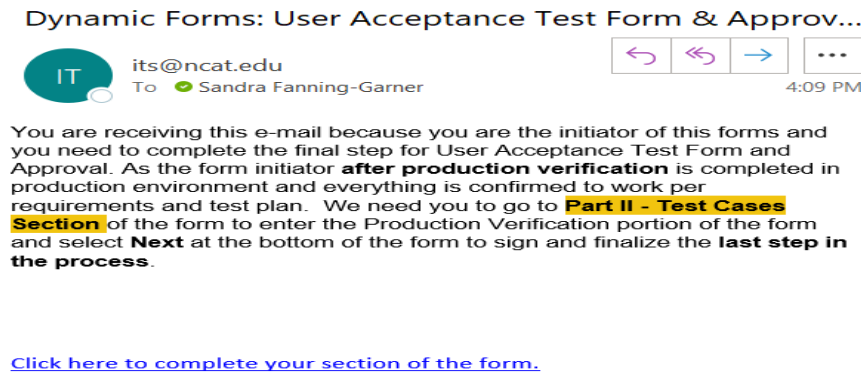

If selected above

13. Once the DBA signs off and moves the code to production, the PM you designated on the instruction screen will receive the following email.

14. After the code is moved to production by the data base administrator (DBA), the next step is the **Production Verification (Cycle II)** phase of the project. The PM must sign the form and the initiator can proceed with production verification.

15. After all ITS signatures have been received for approval, the initiator will receive the email below. The initiator must click on the link in the email to complete the final step: **Production Verification Phase**.

16. The final phase is **Production Verification (Cycle II)**. The initiator should receive an email containing a link to complete this phase. After production verification is completed in NCATPROD or other production environment, the initiator should complete the **Production Verification** section of the form.

Part II. Features to Be Tested (Test Cases): *(Can be recreated using an excel spreadsheet)*

BLOCK WAS MOVED (Optional)

Test Case ID #	Test Item (TASKS):	Expected Results	Integration Testing (Pass or Fail)	Production Verification
01	Test all fields of the UAT Form	All fields work and expect data	Passed	Passed
02	Routing Verified	route to all approvers	Passed	Passed
03	Approval	verify approved	Failed	Failed
Comment required if testing failed:		Option2: Failed but not required for Go Live.		
04	Backend Development	Moved to process and archive	Passed	Passed
	Verification portion	verification blocks appear	Passed	Passed

17. THIS IS THE FINAL STEP & EMAIL

After updating the Production Verification section, select the NEXT button at the bottom of the screen and sign the form. The initiator will receive a final email with his/her name which confirms that that the form has been completed and submitted.
